- A⁵**
1. (Amended) Mixer for mixing at least two flows of gas or other Newtonian liquids, comprising:
a main flow channel through which a first flow of gas passes; and
an incorporated surface arranged in the main flow channel which affects the first flow, the incorporated surface having leading edges that are orientated against the first flow and around which the first flow can move freely, the leading edge having components that act in a main direction of flow of the gas as well as transversely thereto;
wherein the incorporated surface has a chamber into which a separate flow channel for a second flow of gas leads; said chamber being provided on a rear side of the incorporated
